Noé Leonel Rosado Quintal

PROFILE

Full-Stack Developer with 3+ years of experience designing and implementing business systems and web platforms, from the backend (PHP/Laravel, Node/Express) to the frontend (Vue 3, React JS). I have worked on ERPs, customer portals, payment systems and UI/UX redesigns, always focused on accessibility, performance and maintainable code. I pick up new technologies quickly and adapt easily to different stacks and teams.

TECHNICAL SKILLS

PROFESSIONAL EXPERIENCE

January 2026 – Present

Software Engineer — Tire Base

- Implemented Recurrent Payment, a complete payment gateway for credit and debit cards.
- Built Surcharge and Dual Pricing in the POS system, expanding in-terminal payment options.
- Provided ongoing support and improved the card payments module, integrating new methods and add-ons.

January – December 2025

Software Engineer — Intersoft

- Led the full redesign of "Ecom", a widget embedded via iframe in external web applications.
- Redesigned "Tire Access", an iframe-embedded ecommerce, improving responsiveness, UI and UX.

April – October 2024

Jr. Web Developer — Netlancers

- Contributed to an Accounts Receivable (AR) system for managing contracts and payments at a real estate company.
- Developed a customer portal extending the AR system, with PayPal payment integration.

May – December 2023

Web Developer Intern — Netlancers

- Developed the complete Expenses module of an ERP, implementing new operational features.
- Contributed to the custom Accounts Receivable system and its associated customer portal.
